A HOSIERY KNITTING MILL.

Portsmouth Street Railway Extending Its Line to the Heights - A Site Selected For the Factory and a Large Quantity of Brick Already on the Property-Pied-

Hands of the National Trust Co., Which Has Also Bought the Farm Adjoining.

The Portsmouth Street Railway is extending its Prentis Place line through the old Deep Creek road into Pledmont Heights. A large force of workmen is engaged, and it is expected that within ten days the extension will be completed and operating.

The interests of the Real Estate Investment Company, which placed the Heights property on the market, have been purchased by the National Trust Company of Washington. The same concern has bought the Ivey farm, containing twenty acres, which adjoins the Heights, making its real estate holdings here about seventy acres.

The Trust Company is credited with having plans for the location of extensive improvements on its property, one of the improvements on its property, one of the improvements on its property, one in circulation for months, and from the present outlook expectations in this direction are to be realized. It has been known that the building of the factory was dependent to a large extent on the extension of the street railway, so that operatives might ensily get to and from their work from the city, and the fact that the extension is now going on is an encouraging sign in the right direction. Moreover, a site has been chosen for the proposed factory, a large quantity of brick bought and about 100,000 are now lying on the property ready for use. All of these facts bring the prospect of Portsmouth's having another knitting factory within reasonable distance.

Mr. W. B. Whatley, who represented the Real Estate Investment Company and will continue to manage the Heights property for the Trust Company, when seen yesterday was unable to give any definite information. He said, however, that there was very little doubt that the hosiery mill would be built by next spring.
